

## FOR A NARROW LOT.

Modern Cottage Successfully Built Near Boston at Cost of \$4,000.  
[Copyright, 1906, by C. A. & F. M. Russell, Roxbury, Mass.]

This is a design of a modern cottage for a narrow lot, arranged so that all rooms will be lighted from the front and rear.

There are three rooms and a reception hall on the first floor, four rooms and bath on the second floor and three good rooms in the attic. There are two open fireplaces. All plumbing is open, and the water closet is separate from the bathroom.

The rear chamber over the kitchen may be used as a servant's room, as it is convenient to reach it by the rear staircase.

The parlor is finished in white enamel, the dining room in cypress and the

stairs in forest green. The reception hall and sitting room are stained antique oak. All the other finish is North Carolina pine.

There is a laundry in the basement. The house is heated by a furnace. The outside finish can be either pine or cypress. The walls are shingled with clear red cedar shingles and the roof with extra red cedar shingles. With

the shingles stained green and the trimmings white a very attractive effect is secured.

The kitchen is so arranged that no smell of cooking will enter the main house, as there are two doors to the hall and dining room.

The floors in the parlor and dining room are of quartered oak, with borders. The other floors are of the best hard pine, shellacked and waxed.

There is a handy seat in the vestibule, with a drop front for overshoes,

etc. There is also a seat in the nook which opens into the reception hall through an arch.

This house has been built in Cambridge, Mass., at a cost of \$4,000.

## Hints to Home Builders.

Don't forget that a poorly planned and poorly built house costs just as much as the other kind.

Don't try to get your house built for less than it is worth. You will be the loser.

Don't scrimp your building anywhere or forget your wife's comfort when you plan your house.

Don't expect to heat a poorly built house economically.

Don't omit to double your first floor. It will pay in comfort, healthfulness and fuel.

Don't try to build a \$5,000 house for

\$3,000 and don't expect it of your architect. It can't be done.  
Don't undertake to see how cheap you can build, but how well.

Malthoid  
Roofing

There is no better covering for your poultry houses than Malthoid Roofing. It is offensive to insects, clean and odorless, and will remain proof against the severest cold and hot weather. Poultry houses covered with Malthoid are warmer in winter and cooler in summer than those covered with roofs of shingles, boards, tin, iron and many inferior grades of prepared roofing.
